

Is your security system doing all it can to protect your home and family?

Honeywell offers a variety of products and services that go beyond traditional security—enhancing your lifestyle, notifying you of important events occurring in and around your home and providing you with the peace of mind and protection you deserve.

ENHANCED COMMUNICATIONS

Make Sure Alarm Signals Get Through

Honeywell's advanced communications products let your security system communicate with the central station wirelessly (similar to a cell phone). If the

phone line gets cut, the power goes out or if you change your telephone service provider, your security system can operate independently to ensure your home and family are always protected.

Stay Connected to Your Family and Home

Honeywell's Total Connect Remote Services let you utilize PCs, smartphones and any web-enabled device to remotely control your security system and receive important notifications via e-mail and text messages whenever you want, wherever you are. You can even watch live streaming video, view stored video clips and receive images of specific activity occurring around the interior or exterior of your home.

MONITORED LIFE SAFETY

Protect Against the Threats of Fire and Carbon Monoxide

*On average, a fire department responds to a structure fire every 59 seconds and fire claims nine lives every day.**

*Source: www.nfpa.org

Unlike traditional smoke and carbon monoxide detectors, our life safety sensors are connected to your alarm system and are monitored 24/7 to provide automatic notification to our central monitoring station and summon emergency response personnel to the premises if smoke or carbon monoxide is detected in your home.

Whether you're at home or away, awake or asleep or whether your security system is armed or not, these detectors are at work protecting you and your family.

*Over 2,100 deaths occur from carbon monoxide in the U.S. every year.***

**Source: Journal of American Medical Association

In addition to providing you with unmatched protection and peace of mind, monitored smoke and carbon monoxide detectors may qualify you for additional insurance discounts.

STYLE MEETS FUNCTION

A Keypad for Every Home and Lifestyle

There's a Honeywell keypad to suit every lifestyle, budget and décor. Choose from ultra-compact portrait designs, keypads that arm/disarm with a single swipe of a prox tag, wireless keypads and remotes, keypads that talk – even a brilliant touchscreen that doubles as a digital picture frame!
